

KidCoder™: Beginning Web Design

First Edition Errata Sheet

Updated July 7th, 2013

This document lists the known typographical or other corrections to the *KidCoder™: Beginning Web Design* First Edition course.

- In Chapter Nine, Lesson Four, page 175, the “Work With Me” sample code contains the following lines:

```
#two {  
    width: 60%  
    float: right;  
}
```

The “width” line contains two typos. First, it is missing a semi-colon at the end, so the style will not be applied correctly. Second, the 60% width plus, the 30% width from the first paragraph, PLUS the 15px margin around each paragraph is too large to fit both paragraphs side-by-side.

The correct “width” property should be 50% with a semicolon at the end:

```
#two {  
    width: 50%;  
    float: right;  
}
```
