

## Nevada Computer Science Job Opportunities

Nevada, much like the rest of the United States, has a shortage of trained software engineers to fill open jobs. By teaching students computer science skills in middle and high school, you encourage them to pursue a computer science degree in college.

### Nevada Computer Science Job Openings

According to Code.org, there are **5,690 open computing jobs** in Nevada. The average salary is \$83,542.

## Nevada Computer Science Graduates

The US Bureau of Labor Statistics describes computer and related Information Technology jobs as follows:

<https://www.bls.gov/ooh/computer-and-information-technology/home.htm>

The entry-level education requirement for these high-paying jobs is a **bachelor's degree**. Code.org data shows there were **261 Nevada graduates** with a computer science degree in 2020. Therefore, Nevada has a critical need to enroll more students in computer science degree programs. Help fill this gap with Nevada students by offering a CompuScholar class!
