

CompuScholar, Inc.
 Alignment to Ohio's "145060 Programming" Standards

Course Title: TeenCoder: Java Programming (Abridged)

Course ISBN: **978-0-9887070-4-7**

Course Year: **2015**

Grades: **9th - 12th grade** (high school)

Career Field	Information Technology
Course Name	145060 - Programming
Description	In this course, students will learn the basics of building simple interactive applications. Students will learn the basic units of logic: sequence, selection, and loop. Students will apply algorithmic solutions to problem- domain scenarios. Students will gain experience in using commercial and open source languages, programs, and applications.

Strand	2. IT Fundamentals	
Description	Learners apply fundamental principles of IT, including the history of IT and its impact on society, common industry terms, systems theory, information storage and retrieval, database management, and computer hardware, software, and peripheral device configuration and installation. This base of knowledge and skills may be applied across the career field.	
Outcome	2.3. Data Encoding: Explain and describe data encoding basics.	CITATION(S)
2.3.1. Identify and explain coding information and representation of characters (e.g., American Standard Code for Information Interchange [ASCII], Extended Binary Coded Decimal Interchange Code [EBCDIC], Unicode).		Chapter 5, Lesson 2
2.3.2. Convert between numbering systems (e.g., binary, hexadecimal, decimal).		Chapter 17, Lesson 2
Outcome	2.9. Project Concept Proposal: Develop a project concept proposal.	CITATION(S)
2.9.1. Identify and incorporate branding strategies.		n/a
2.9.2. Determine the scope and purpose of the project.		Chapter 21, Lesson 1 Supplemental Lesson 4
2.9.3. Determine the target audience, client needs, expected outcomes, objectives, and budget.		Chapter 21, Lesson 1 Supplemental Lesson 4
2.9.4. Develop a conceptual model and design brief for the project.		Chapter 21, Lesson 1 Supplemental Lesson 4
2.9.5. Develop a timeline, communication plan, task breakdown, costs (e.g., equipment, labor), deliverables, and responsibilities for completion.		Chapter 21, Lesson 1 Supplemental Lesson 4
2.9.6. Develop and present a comprehensive proposal to stakeholders.		Chapter 21, Lesson 1 Supplemental Lesson 4

Outcome	2.11. Troubleshooting: Select and apply troubleshooting methodologies for problem solving.	CITATION(S)
2.11.1. Identify the problem.		Chapter 9, Lessons 1 - 4 Chapter 21, Lesson 4
2.11.2. Select troubleshooting methodology (e.g., top down, bottom up, follow the path, spot the differences).		Chapter 9, Lesson 3 Chapter 21, Lesson 4
2.11.3. Investigate symptoms based on the selected methodology.		Chapter 9, Lessons 3 - 4 Chapter 21, Lesson 4
2.11.4. Gather and analyze data about the problem.		Chapter 9, Lesson 3 Chapter 21, Lesson 1
2.11.5. Design a solution.		Chapter 9, Lesson 3 Chapter 21, Lesson 2
2.11.6. Test a solution.		Chapter 9, Lesson 3 Chapter 21, Lesson 4
2.11.7. Implement a solution.		Chapter 9, Lesson 3 Chapter 21, Lesson 3
2.11.8. Document the problem and the verified solution.		Chapter 9, Lesson 3 Chapter 21, Lesson 4
Outcome	2.12. Performance Tests and Acceptance Plans: Develop performance tests and acceptance plans.	CITATION(S)
2.12.1. Create a written procedure agreed by the stakeholders and project team for determining the acceptability of the project deliverables.		Supplemental Lesson 4
2.12.2. Develop a test system that accurately mimics external interfaces.		n/a
2.12.3. Develop test cases that are realistic, compare with expected performance, and include targeted platforms and device types.		Chapter 9, Lesson 3 Chapter 21, Lesson 4
2.12.4. Develop, perform, and document usability and testing integration.		n/a
2.12.5. Make corrections indicated by test results.		Chapter 9 Activity Chapter 21, Lesson 4
2.12.6. Seek stakeholder acceptance upon successful completion of the test plan.		n/a
Outcome	2.13. Rollout and Handoff: Plan rollout and facilitate handoff to customer.	CITATION(S)
2.13.1. Include overall project goals and timelines in the rollout plan.		Chapter 21, Lesson 1 Supplemental Lesson 4
2.13.2. Communicate rollout plans to key stakeholders in a timely manner.		Chapter 21, Lesson 1 Supplemental Lesson 4
2.13.3. Conduct final review and approvals according to company standards.		Chapter 21, Lesson 4

2.13.4. Identify support staff, training needs, and contingency plans in the rollout plan.		n/a
2.13.5. Test delivered application to assure that it is fully functional for the customer or user and meets all requirements.		Chapter 21, Lesson 4
2.13.6. Deliver support and training materials.		n/a
Outcome	5.1. Programming Concepts: Describe programming concepts.	CITATION(S)
5.1.1. Describe how computer programs and scripts can be used to solve problems (e.g., desktop, mobile, enterprise).		Chapter 17, Lesson 4
5.1.2. Explain how algorithms and data structures are used in information processing.		Chapter 4, Lessons 1 - 2 Chapter 10, Lesson 2 Chapter 14, Lessons 1 - 2 Chapter 17, Lesson 4
5.1.3. Model the solution using both graphic tools (e.g., flowcharts) and pseudocode techniques.		Chapter 17, Lesson 4
5.1.4. Describe, compare, and contrast the basics of procedural, structured, object-oriented (OO), and event-driven programming.		Chapter 2, Lesson 2 Chapter 8, Lesson 1 Chapter 10, Lesson 1 Chapter 12, Lesson 3
5.1.5. Describe the concepts of data management through programming languages.		Chapter 4, Lessons 1 - 2 Chapter 10, Lesson 2 Chapter 14, Lessons 1 - 2
5.1.6. Analyze the strengths and weaknesses of different languages for solving a specific problem.		Chapter 1, Lesson 3
5.1.7. Compare and contrast the functions and operations of compilers and interpreters.		Chapter 2, Lesson 1
5.1.8. Describe version control and the relevance of documentation.		Supplemental Lesson 4
Outcome	5.2. Computational and String Operations: Develop code that performs computational and string operations.	CITATION(S)
5.2.1. Compare and contrast primitive types of numeric and nonnumeric data (e.g., integers, floats, Boolean, strings).		Chapter 4, Lessons 1 - 2 Chapter 5, Lesson 1
5.2.2. Identify the scope of data (e.g., global versus local, variables, constants, arrays).		Chapter 10, Lesson 2
5.2.3. Write code that uses arithmetic operations.		Chapter 4, Lesson 2 and throughout the course
5.2.4. Write code that uses subtotals and final totals.		Chapter 17, Lessons 3 - 4 and throughout the course
5.2.5. Write code that applies string operations (e.g., concatenation, pattern matching, substring).		Chapter 5, Lessons 1 - 5

Outcome	5.3. Logical Operations and Control Structures: Develop code that uses logical operations and control structures.	CITATION(S)
5.3.1. Explain Boolean logic.		Chapter 7, Lesson 1
5.3.2. Solve a truth table.		n/a
5.3.3. Write code that uses logical operators (e.g., and, or, not).		Chapter 7, Lesson 1 and throughout the course
5.3.4. Write code that uses relational operators and compound conditions.		Chapter 7, Lesson 1 and throughout the course
5.3.5. Write code that uses conditional control structures (e.g. if, if-then-else).		Chapter 7, Lesson 2 and throughout the course
5.3.6. Write code that uses repetition control structures (e.g., while, for).		Chapter 7, Lesson 4 and throughout the course
5.3.7. Write code that uses selection control structures (e.g., case, switch).		Chapter 7, Lesson 3 and throughout the course
5.3.8. Write code that uses nested structures and recursion.		Chapter 19, Lessons 1 - 3
5.3.9. Write code that creates and calls functions.		Chapter 8, Lessons 1 - 3 and subsequent activities
5.3.10. Code error-handling techniques.		Chapter 6, Lesson 3 Chapter 9, Lesson 2
5.3.11. Write code to access data repositories.		Chapter 18, Lessons 2 - 3
5.3.12. Write code to create classes, objects, and methods.		Chapters 10, 11, 15, 16
Outcome	5.4. Integrated Development Environment: Build and test a program using an integrated development environment (IDE).	CITATION(S)
5.4.1. Configure options, preferences, and tools.		Chapter 3, Lessons 1 - 2
5.4.2. Write and edit code in the IDE.		Chapter 3 and all subsequent chapters
5.4.3. Compile or interpret a working program.		Chapter 2 and all subsequent chapters
5.4.4. Define test cases.		Chapter 9, Lesson 3 Chapter 21, Lesson 4
5.4.5. Test the program using defined test cases.		Chapter 9, Lesson 3 Chapter 21, Lesson 4
5.4.6. Correct syntax and runtime errors.		Chapter 9, Lesson 3 Chapter 21, Lesson 4
5.4.7. Debug logic errors.		Chapter 9, Lesson 3 Chapter 21, Lesson 4

Outcome	5.5. Programming Conventions: Develop programs using applications security best practices according to information security policies (e.g., cross-site scripting, Structured Query Language [SQL] injection attack, bounds-checking).	CITATION(S)
5.5.1. Develop programs using data validation techniques.		Chapter 6, Lesson 3 Chapter 21, Lesson 2
5.5.2. Develop programs that use reuse libraries.		Chapter 17, Lesson 1 JRE and Java class libraries used throughout the course
5.5.3. Develop programs using operating system calls.		JRE and Java class libraries used throughout the course
5.5.4. Develop programs that call other programs.		n/a
5.5.5. Use appropriate naming conventions and apply comments.		Chapter 2, Lesson 2 Chapter 4, Lesson 2
5.5.6. Format output (e.g., desktop, mobile, enterprise, reports, data files).		Chapter 5, Lessons 3 - 5
Outcome	5.6. Software Development Lifecycle: Apply the software development lifecycle (SDLC).	CITATION(S)
5.6.1. Determine requirements specification documentation.		Chapter 21, Lesson 1 Supplemental Lesson 4
5.6.2. Identify constraints and system processing requirements.		Chapter 21, Lesson 1 Supplemental Lesson 4
5.6.3. Develop and adhere to timelines.		Chapter 21, Lesson 1 Supplemental Lesson 4
5.6.4. Identify a programming language, framework, and an integrated development environment (IDE).		Chapter 21, Lesson 1 Supplemental Lesson 4
5.6.5. Identify input and output (I/O) requirements.		Chapter 21, Lesson 1 Supplemental Lesson 4
5.6.6. Design system inputs, outputs, and processes.		Chapter 21, Lesson 1 Supplemental Lesson 4
5.6.7. Document a design using the appropriate tools (e.g., program flowchart, dataflow diagrams, Unified Modeling Language [UML]).		Chapter 17, Lesson 4 Supplemental Lesson 5
5.6.8. Create documentation (e.g., implementation plan, contingency plan, data dictionary, user help).		Chapter 21, Lesson 1 Supplemental Lesson 4
5.6.9. Review the design (e.g., peer walkthrough).		Chapter 21, Lesson 4
5.6.10. Present system design to stakeholders.		Chapter 21, Lesson 2 Supplemental Lesson 4

5.6.11. Develop the application.		Chapter 21, Lesson 3
5.6.12. Compare and contrast software methodologies (e.g., agile, waterfall).		Supplemental Lesson 4
5.6.13. Perform code reviews (e.g., peer walkthrough, static analysis).		Chapter 21, Lesson 4
5.6.14. Ensure code quality by testing and debugging the application (e.g., system testing, user acceptance testing).		Chapter 21, Lesson 4
5.6.15. Train stakeholders.		n/a
5.6.16. Deploy the application.		n/a
5.6.17. Collect application feedback and maintain the application.		n/a
Outcome	5.7. Configuration Management: Describe configuration management activities.	CITATION(S)
5.7.1. Explain version management and interface control.		Supplemental Lesson 4
5.7.2. Explain baseline and software lifecycle phases.		Supplemental Lesson 4
5.7.3. Analyze the impact of changes.		n/a

Strand	6. Web Development	
Description	Learners apply principles of design and technology, including programming standards and protocols, to create, test, host, and maintain webpages and websites with text, graphics, multimedia, scripting, linking, and data integration in a structure that is easy to navigate and accessible for all users via a variety of hardware and software platforms.	
Outcome	6.3. Scripting: Integrate scripting into a webpage.	CITATION(S)
6.3.1. Select and apply scripting languages used in web development.		n/a
